ONE YEAR. SIX MONTHS ...

The Democrats of the Second District have nominated Hon. Samuel Dibbie, of Orangeburg, as their candidate for Congress to succeed the late Hon. M. P. his promotion. Although a citizen of is an excellent one, and his election will give to the people of the State an able dence here, and will always be gratified and vigilant representative. The election comes off to-day, and it is well life. known that the Republicans intend voting for E. W. M. Mackey. Gen. Dibble deserves success, and it would be a strange exhibition if E. W. M. Mackey can beat so good a man. The colored vote is largely in excess in this District, but we trust there will be a sufficient defection in it to elect the Domocratic can-

ANDERSON'S MINERAL WEALTH.

Prof. C. Fromm, an experienced mineralogist who has resided in Anderson for the past two years, and has made during that time numerous discoveries of valuable minerals, has consented to collect for Col. A. P. Butler, Commissioner of Agriculture for this State, specimens of the minerals of Anderson County to be exhibited at the Atlanta Exposition this Fall. Any person having ores of any kind can have them examined without charge by bringing them to Prof. Fromm at this place, who will also take charge of specimens of minerals from this County for the Exposition in Atlanta. During his stay in Anderson he has found the following minerals here: Copper, gold, galena, asbestos, kaolin, granite, tourmalin, kyanite, chalcedony, chrysolite and sumerhite. In his opinion the following mines

would pay a good dividend upon the necessary capital to operate them. A mica mine, situated on the land of Mr. Samuel Whorton, in the Corner

A mine of the same on the land of

Capt. Jas A. Gray, in the same township. A mine of corrundum and zircon, situated on lands of Messrs. Ben Strickland

and John Kaufman, in Hall township. Mines of plumbago, situated on lands of Rev. Wilson Ashley and Mr. John T. Ashley, in Martin township.

These mines are said by Prof. Fromm to be the most extensive and valuable plumbago mines in the whole country. He took from one of them a solid lump of one hundred and forty pounds, and is satisfied that a lump of pure quality can be taken out weighing from on thousand to ten thousand pounds. The vein extends from fifty to one hundred feet in thickness, and appears to be very rich. He thinks there are other minerals in the County ... ith veins of sufficient richness to repay working, but as yet they have not been sufficiently explored to base an opinion upon their quality and

These are matters of considerable importance to the county, and we hope our citizens will render Prof Fromm every assistance possible in his efforts to make a handsome collection for display in Atlanta.

THE ATLANTA EXPOSITION.

The Cotton Exposition, which is to be held in Atlanta, beginning on the third of October and ending in December, promises to be such a success that its directors have decided to extend the scope of the original enterprise, so as to make it in reality an Industrial Exposition, and with this purpose in view exhibits of the resources and products of the Southern States are invited, and will doubtless be contributed in large numbers. It is, therefore, important that our State should be thoroughly represented in every department of her wonderful resources, in order that her capabilities is mineral, agricultural, mechanical and manufacturing development may be fully demonstrated to the thousands of visitors from every section of this country and Europe who will gather in Atlanta during that period. It will be the best possible advertising medium for our State, and a creditable exhibition

A Mysterious Affair. for our State, and a creditable exhibition for our State, and a creditable exhibition from South Carolina on this occasion will do more to attract hither an immigration of capital and worthy labor than all of the circulars, newspaper articles and immigration agents in the State can do. Realizing this fact, Col. A. P. Butler, our able and watchful Commissioner of Agriculture, has taken active steps to secure a full representation in the exhibits from this State, and has received very gratifying assurance of co-operation from the various counties. Specimens are wanted of Wheat Corn, Oats, Pess Rys, Barley, Cotton, Rice, Buckwheat, Flax, Peanuts, Tobacco, Millet, Clover and Grasses, Dried Fruit, Chufas, Molasses, Wines, Woods, Minerals, Stone, any agricultural or mechanical home manuagricultural or mechanical home manufactures, birds and insects, and "everything that will show the wealth of the country." Among the articles specially desired are, the largest pumpkin, gourd, car of corn, stalks of corn, and rotton, boll of cotton, head of wheat, mad of outs, Athibits of manufactured goods, and in fact, everything that will display the enterprise, skill, and natural advantages of the country. We are gratified to see such general interest, and trust that while the various portions of the State will see the various portions of the State will be fully represented, that Anderson, would probably be appointed Soliction. While we are naturally pleas so had Maj. Murray been hardly less so had Maj. Murray been bardly less so had Maj. Murray been bardly less so had Maj. Murray of columbia represented him to be. Aside from being a most worthy representative of journalism in the State, he is a man whose tabuts and position make his while the various portions of the State will fit to occupy and adorn public position. He has a glenty of thus however for the falliment of whatever londary of the special pleasure because we have frequently different will had. Murray on different country. Our cottons are mid to rank exceptionally high, and should by all mans be extincted in Allants. We commend this suggest to our various agricultural or mechanical home manucommend this subject to our various Granges as one worthy of their concideration, and falling wishes their peculiar province. The way to make a certainty of the matter will be to arrange for the schibit waite the crop is growing. Work, gather and propare it for exhibi-tion, and it will allow to the best advan-

The Governor on last Wednesday apointed Col. Jarges L. Orr, formerly of Anderson, but now an attorney of the Greenville bar, Solicitor of the Eighth Circuit, to succeed Judge Cothran. Col. Orr is an attorney of ability and vigor, who will discharge the duties of the important office to which he has been appointed in an efficient and creditable manner. Col. Orr for two terms represented this County in the State Legislature, and as a member of the historic Wallace House, made a reputation and formed attachments which have led to O'Conner. The selection of Gen. Dibble Greenville our prople feel a peculiar interest in him, because of his former resiat any success which may attend him in

> Mr. Conkling is an expert at producing dead-locks. He is credited with engineering the recent Senatorial deadlock in Washington, and now he is running a little one of his own in the New York Legislature at Albany. In the race for re-election to the Senate he has fallen far below the expectation of the public, only commanding at best 32 votes out of a possible 108 Republican votes. This, however, is enough to make dead-lock, as the Democrats vote for Democratic candidates. The Legislature being unable to elect will probably adjourn soon. This gives the election of Senators to the next Legislature, which will be chosen this summer, and will probably give to the Democrats two new Senators. At least it will make the campaign in New York exceedingly interesting. In the meantime Mr. Conkling stands out as the most successful promoter of dead-locks.

The applicants for the Sollatorship of the Eighth Circuit, made vacant by the appointment of Judge Cothran to fill the unexpired term of the late Judge Thomson, were Mesara. J. L. Orr, J. W. Gray, plumbago, epidote, corrundum, zircon, M. F. Ansel, A. C. Garlington and amethyst, beryl, garnet, rutile, mlca, C. W. Furman, of Greenville; Mr. E. rock crystal, serpentine, manganeese, B. Gary, of Abbeville; Messrs. E. B. Murrray and B. F. Whitner, of Anderson, and Mr. J. S. Verner, of Walhalla. All of these gentlemen were endorsed by their friends, and as they were so numerous it was impossible for any one of them to secure the endorsement of a majority of the professional or political influences of the Circuit. In this condition of the canvass, the appointment was reduced practically to a matter of personal prefrence on the part of the Governor.

The Readjusters' Convention in Richmond last week nominated Cameron for Governor and Lewis for Lieutenant-Governor. It i'so endorsed Mahone. They have performed the easiest part of their task. The hardest work before them is the election of their ticket, and from present appearances they will not be able o accomplish it.

The Clydes are not to scoop up the Augusta and Knoxville Road without a contest. The Virginia Midland is also after it. Between the two the people of Augusta are likely to obtain very liberal terms in any disposition they may make of their stock in the road.

Conkling has endorsed Mahone, but the trouble is just now that Conkling needs an endorsement himself which he does not seem able to get.

A Scheme of the Clydes.

Avousta, June 1.—Col. A. C. Haskell, president of the Charlotte, Columbia and Augusta Railroad, has been here all day in conference with President Verdery, of the Augusta and Knoxville Railroad, and with the mayor of the sity, the chiest of his visit, the chiest of his visit, the chiest of his visit, the chiest of the column of the column.

AN ORDINANCE

To Enforce the Payment of the Tax on Dogs—To Require Owners to keep Collars on them—To punish Interference with such Collars, and to Punish persons for allowing Stats to run at large while Proud.

DE it Ordsined by the Intendant and Wardens of the Town of Anderson, S. C., in Council assembled, and by the authority of the same—

SECTION I. That every person who owns a dog within the incorporate limits of the Town of Anderson, S. C., shall, from and after Monday, the 20th day of June inst., keep continually upon the neck of each and every dog or slut owned by such person a Collar, procured from the Clerk of the Town Council, which shall be numbered and registered by said Clerk in a book to be kept by him for that purpose, wherein the date upon which such Collar is obtained, its number, and the name of the person who procures it shall be kept.

SEC. 2. The said Clerk shall furnish without cost the above—mentioned Collars, upon the application of the owner of each dog upon which a tax of fifty cents per head has been paid into the Town treasury during the present fiscal year, and he shall furnish such Collars for any dog upon which a tax of fifty cents per head has been paid into the Town treasury during the present fiscal year, and he shall furnish such Collars for each dog for which such Collar is procured. In every succeeding year upon the payment to him of the said tax of fifty cents for each dog for which such Collar is procured. In every succeeding year the said Clerk shall issue to the owner of every dog a Collar as prescribed in Section 1 hereof, as soon as the tax on such dog is received by him.

SEC. 3. The Town Marshal and his Assistants are hereby authorized and required to take up and inpound any dog or slat found within the incorporate limits of the Town cher the date fixed in Section 1 hereof, and keep and confine in a proper pen in the Town for the period of twenty-four hours, during which the owner may claim and redeem such dog or slut by paying into the Town Council a Collar as hereinbefore provided; but if no owner shall, within the time prescribed, claim such dog or slut so remaining unredeemed.

Sec. 4. When any such Collars shall be broken or lost, the owner of the dog or slut owner. Se

VAN WINKLE'S king cotton press Mannufactured at Atlanta, Ga.,

As long been before the public, and is too well known to need any further description. Its thief points of merits are: It takes very little room, is easily handled, and takes so little power; can be used on all kinds of powers—horse, water or steam. Ginulug and packing can all go on at the same time, without interfering with the Gin. A two-inch belt will pack a 500 lb. bale of cotton. It saves its cost the first reason in labor. Read the following feetimonials:

ANDERSON, S. C., April 30, 1881.—Mr. John E. Peoples—Sir: The Steam Power Van Winkle Cotton Press bought from you last fall has given entire satisfaction. I packed bales of cotton weighing 600 to 725 lbs. in five minutes with all case, using a 4-inch belt and 25 lbs, steam. There did not seem any more strain on the Press than with a 450 lb. bale. For strength, durability, lightness of power, small quantity of steam required, economy of space, I deem it the King of all Cotton Presses; especially so as the low price at which it can be bought for puts it within reach of every man running a steam Gin. In fact, I would not be without it for twice its cost. I would advise all my friends to buy one of Van Winkle's Steam Power Cotton Presses, as you will save its cost in labor in one year.

ANDERSON, S. C., May 19, 1881.—John E. Peoples—Dear Sir: The Van Winkle's Steam Power Press bought of you last season has siven perfect satisfaction, and I consider it the best Power Press I have were seen.

S. N. PEARMAN.

ANDERSON, S. C., May 16, 1831.—John E. Peoples—Dear Sir: The Van Winkle's Steam Power Press we bought of you last fall is the very Press adapted to the wants of the farmers of this County. It saves labor, takes but very little room, and very little power to run it up and down. We only work one hand with our Press. Can cheerfully recommend it to sony one wishing to purchase a Press, as it will save its cost in a short time. We packed bales weighing over 600 lbs. with a 4-inch belt.

HEADQUARTERS

MACHINERY

For the counties of Abbeville, Anderson, Geonce. Pickens, Greenville and Laurens.

Steam Engines, Steam Power Presses, Cotton Gins,

HE above cut represents the HALL SELF-FEEDING COTTON GIN, manufactured at Sing Sing, New York, which has been sold in all of the above-named Counties, and which has given entire satisfaction wherever used. The saws are made of the best imported steel. The saw shaft is the largest made. An examination of other Gins will convince you it is the most substantially built Gin in usc. It never breaks the roll, and therefore does away with the expense of the revolving head, as the secret of making the Gin to prevent its breaking the roll is in the proper shape of the roll-box. It is the only Gin that runs successfully with the Feeder and Condenser attached, and the only Gin that will feed yellow cotton. Below I give you a few testimonials and names: Lewis C. Clinkscales, Abbeville; A. J. Stringer, J. W. Poore, Belton, W. M. Shirley, S. R. Timms, John D. Kelly, Basil Callaham, and many others: HE above cut represents the HALL SELF-FEEDING COTTON GIN, man

Brewerton P. O., Laurens Co., August 6, 1880.

Mr. John E. Peoples, Anderson, S. C.—Sir: The 60-Saw Hall Cotton Gin, Feeder and Condenser we bought of you last Fall is a perfect puccess in overy respect. We run it by steam, and gin 10 bales of 450 lbs. pen day with ease. It is the best constructed and finest finished Gin I ever saw. It gins faster, makes a better sample, and thus far excels in turnout any Gin ever used in this part of the country. This can be proved by all the people who have had cotton ginned by me. We ginned for the public last Fall 600 bales, and give the best satisfaction of all the ginners. The seed being so perfectly clean, it makes a better sample. Further, it separates from the seed cotton, before going into the roll-box, rocks, grit, nails and matches. There is less danger from fire, owing to the Self-Feeder taking out all hard misbatances before they come in contact with the saws. The cotton picked by the Cla the last season was carefully weighed before it was picked and after being baled, and the average yield the season through was 1 lb. of lint for every 2½ lbs. of seed cotton. I have used since the war Gins of four different makes. Yours makes a better liut, cleans the seed better, gins much faster, and for its simplicity unsurpassed. I think it is destined, in a great measure, to supersede all others. I heartily recommend it to those who wish to purchase Gins. It will more than repay the additional cost.

KNIGHT & BALENTINE.

KNIGHT & BALENTINE.

Mr. John E. Peoples, Anderson, S. C.—DEAR SIR: Your favor of the 30th of April received, and in reply I have to say that after a very late start I ginned 150 bales of cotton on the Hall Sell-Feeding Cotton Gin. Everything has worked well, and the whole outfit has given entire satisfaction, both to my customers and myself. I would not think of running a Gin without the Feeder and Condenser. The Feeder does better work than possibly can be done by hand. Both the Feeder and Condenser are indispensable.

Yours truly, JOSEPH D. PINSON. ANDERSON, S. C., May 7, 1881.—John E. Peoples, Agent Hall's Gin.—Sir: The 40-Saw Hall Gin, made at Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction. It cleans the seed well, and makes a superior lint, and runs light. The saw shaft and saws are the best I ever saw.

L. H. WELBORN.

To J. E. Peoples—The 50—Saw Hall Gin, Feeder and Condenser I bought from you last Fall beats any Gin I have ever seen, and I have used and tried four different kinds. It runs light, makes a good sample, gins fast, and will surpass any Gin in making a good turnout and in cleaning the seed. Now, if you desire a good Gin, try the Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y. The Feeder and Condenser can't be beat, as the Feeder will feed any kind of cotton—yellow or dog-tail.

ABRAM BOLT.

Anderson, S. C., May 18, 1881.—John E. Peoples, Anderson, S. C.—Dear Sir.:
The 60-Saw Hall Gin, Feeder and Condenser, made by Hall S. F. Cotton Gin Co.,
Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction to myself
and customers. I have used the Emery, Star and Needle Gins, and much prefer the
Hall to either of them. I ginned last season upwards of 400 bales cotton on the
Hall Gin, and during the whole season the Gin, Feeder and Condenser did not give
me an hour's delay. I can cheerfully recommend it to any one wishing to purchase
a Gin. I found no difficulty in ginning yellow cotton, as the Feeder feeds yellow
cotton, and takes out all grit and hard substances before it comes in contact with
the saws.

WM. A. NEAL.

Anderson, S. C., April 30, 1881.—John E. Peopies, Anderson, S. C.—Dear Sie: The 80-Saw Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y., bought of you last Fall, beats anything of the kind that I have ever used, and I have used several different makes of Cotton Gins. It is the best Gin in use for durability, lightness of draft, cleaning the seed parfectly, and never breaks the roll, and gives entire satisfaction to myself and customers. I was burnt out the 25th of last September, and my customers waited one month on me until I could get another Hall Gin to gin their cotton. This can be proven by my neighbors. The Feeder and Condenser can't be beat. I have never had any trouble with them.

Yours truly,

M. A. COBB.

Piercerown, S. C.—Mr. J. E. Peoples, Anderson, S. C.—Dear Sir: The 50-Saw Self-Feeding Hall Cotton Gin, with Condenser attached, made at Sing-Sing, N. Y., jurchased of you last Fall has given entire satisfaction. It saves the labor of one hand, and feeds more regularly than could be done by hand, never breaking the roll for a day at a time if attended to. I ginned 350 bales last Fall with it, and it is in as good order appearantly as ever. It makes samples to compete with any other gin. Mr. Sanford Martin had a bale ginned on my gin last Fall that was proncunced by the Piedmont Manufacturing Company to be the best ever brought to that market.

D. H. HAMMOND.

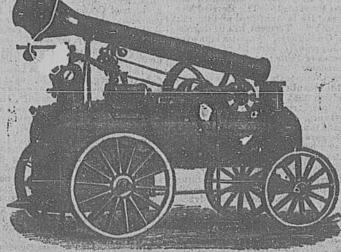

Due West, S. C., July 24, 1880.—Mr. J. E. Peoples.—Dear Sin; In answer to your postal I will say that the Hall Self-Feeding Cotton Gin, made at Sing-Sing, N. Y., that I bought of you has given entire satisfaction. I ginned nine bales a day weighing 450 lbs. Cleans the seed perfectly and makes a superior sample of lint. I want no better for speed and lightness of draft. Only wish I had taken an b0-saw instead of a 60-saw.

Yours truly,

J. L. HADDON.

Anderson, S. C., May 14, 1881.—Ino. E. Peoples, Anderson, S. C.—The Hall Gin manufactured at Sing-Sing, N. Y., and purchased of you last season, is the best constructed and finest finished gin we have ever used. It runa light, never chokes or breaks the roll, and for sample cannot be excelled by any gin ever used in this section. It has given this neighborhood entire satisfaction, and in our opinion is equal to or better than any other gin in use to our knowledge, and would advise any one wishing to purchase a good gin to buy the Hall Gin in preference to any other,

MARTIN & DUCKWORTH, Williamston, S. C.

THE SCHOFIELD ENGINE, which has been sold in every section of the Southern States, and which has given such universal satisfaction, will be kept on hand, and sold at prices that will compete with any first-class Engine manufactured. The following testimonials will give an evidence of its superior simplicity, durability and

Anderson, S. C., May 6, 1881.—John E. Peoples—Dear Sir; The Sc! mield Engine purchased of you—Jax-horse power—has given perfect satisfied ion. It is the best Engine I have ever used, and I have used three other different makes. I like it for three reasons, 1st. It is simple and durable. 2nd, It rans smoother and steadler than any Engine in our country. 3rd. It has more power than any Engine made to the number of horse-power. I run a 50-Saw Gin and Feeder with 25 lbs. steam, and can recommend this Engine as the one for farmers to buy.

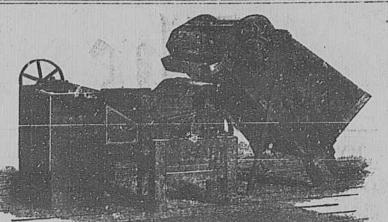

J. M. CHAMBLEE.

Piercerows, S. C.—Mr. J. E. Peoples—Dear Sir: The five-horse power Schofield Engine purchased of you last Fall has given satisfaction. My engineer says it is the lightest running Engine he ever had anything to do with. Can keep up more steam with less wood than any other. It rams a 50-Saw Hall Gin, with Peeder and Condenser attached, with all ease, and aim search balls now day. wood than any other. It runs a 50-Saw Hall Gin, with Freder and Condenser attached, with all case, and gin seven bake per day.

ABDERSON, B. C., April S. 1881.—To J. E. Peoples: The six-horse Schofield Engine I bought from you last Fall has given entire satisfaction. It is very simple in its machinery, and any ordinary man can run it without any trouble. I am running a 40-inch Circular Saw Mill, and have sawed as high as 3000 feet in one day out of old field pine logs—logs being very small. It has more power than any G-horse Engine I ever saw I cheerfully recommend this Engine to all who desire an Engine. It can't be beat as to smooth running.

ABRAM BOLT.

Samples of the above Machinery can be seen by calling at my Store, and par-ties desiring to purchase will find it to their interest to call on or confer with me by JOHN E. PEOPLES, Agent, Anderson, S. C.

DANIEL PRATT GIN COMPANY GIN. FEEDER and CONDENSER.

THIS is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22.000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in aimost every other country where cotton is grown.

The Revolving Head placed in the end of the cotton-box prevent the Gin from choking and the roll from breaking. Any common plantation hand being able to feed the Gin satisfactorily. The Feeder is superior to any other machine of the kind in use. They are simple in construction, and easily managed. They stand upon the floor, and are therefore not so hard to get at. The Condenser is equal to any in use—we believe superior to any now made. The lower end of the cylender being open, all dirt from the lint is driven through the floor by the air from the gin-brush. By the use of this Condenser the lint-room can be entirely done away with, saving many dollars in the construction of buildings, making the labor of handling the cotton before packing far easier, and loss and damage by fire is reduced to a minimum. The Feeder at d Condenser will pay for themselves in one season. Every machine is fully warranted to do perfect work, and until the purchaser is fully satisfied with the machine we do not ask for payment. Should any machine prove in any way defective, we make the same good at our expense, upon notice being given to us. We give the names of gentlemen in this and adjoining Counties who have the Dariel Pratt Gins, Feeders and Condensers in use, and refer the public to them, believing that their recommendation of the machines will be more satisfactory to any one desiring to purchase than the ordinary stereotyped form so amnon:

J. B. Adger,

Jno. Thos. Ashloy,
